

RE-RI

RESPONSE INDICATOR

General

Response indicators are used as an auxiliary indication for detectors that are located in closed spaces such as above false roofing, below false floor and closed rooms. Detectors are equipped at the terminals for connecting their response indicator. The LED's on this indicator lights up when the corresponding detector gets latched or detects fire.

Features

- Compatible for 2 wire detectors.
- Alarm status is indicated by red colour LED.
- Operates on 12 VDC.
- Dual LED's for 360 visibility.
- Flush / Ceiling wall mount.
